

# FS Concrete Form Oil

## Description

FS Concrete Form Oil is a light-colored, nonstaining oil for use on concrete forms. This oil is formulated with a combination of spreading and release agents that provides even spreading of the oil on concrete forms and prevents cement from sticking to the forms. **FS Heavy Concrete Form Oil** can be prediluted up to 3:1 with No.1 fuel oil. **FS Light Concrete Form Oil** is prediluted. The optimal dilution ratio depends on trial and experience. Form oil improves the stripping of forms and extends form life by protecting wood surfaces and preventing rust on metal forms. It can be applied by brush or spray.

## Typical Properties

Test / Description	Specification		
	Light	Heavy	Proform
Viscosity @ 100°C (cSt)	NA	4.3	3.0
Viscosity @ 40°C (cSt)	1.5	22.0	12.5
Viscosity Index	NA	100	90
Density (lb/gal)	6.72	7.14	7.14
Pour Point (°C)	-54	-36	-21
Pour Point (°F)	-65	-33	-6
Flash Point (°C)	74	206	165
Flash Point (°F)	165	403	329
